- 20 Capital adequacy
- 23 Credit risk
- 23 Credit risk and credit risk mitigation in the IRB Approach
- 24 Market risk
- 24 Internal model

Annex

25 List of Abbreviations

Preamble

The Helaba Group

Landesbank Hessen-Thüringen Girozentrale, Frankfurt am Main and Erfurt (Helaba) is a credit institution organised under public law. Its long-term strategic business model is that of a full-service bank with a regional focus, a presence in carefully selected international markets and a very close relationship with the Sparkassen-Finanzgruppe.

Helaba provides services for its customers in three different roles. As a commercial bank, it provides support for customers in Germany and abroad. As a Sparkasse central bank, it provides products and services for 40 % of all Germany's Sparkassen. In its capacity as the central development institution for Hesse, Helaba administers public-sector development programmes through Wirtschafts- und Infrastrukturbank Hessen (WIBank). Frankfurter Sparkasse (FSP), the regional market leader in retail banking, is a wholly owned subsidiary of Helaba. In addition to FSP and WIBank, other entities that form part of the Helaba Group include 1822direkt online bank and Landesbausparkasse Hessen-Thüringen (LBS). The Bank's registered offices are situated in Frankfurt am Main and Erfurt, and it also has branches in Düsseldorf, Kassel, Paris, London and New York. The branches allow Helaba to strengthen its local presence close to customers and Sparkassen. In addition, Helaba's international branches open access to funding markets. The organisation also includes representative and sales offices, subsidiaries and affiliates.

Helaba's business model

Disclosure Report

Helaba is the superordinated institution in the Group and, as such, is responsible for meeting the disclosure requirements at Group level in accordance with Part 8 of Regulation (EU) No 575/2013 (Capital Requirements Regulation, CRR) in conjunction with European Banking Authority (EBA) guideline EBA/GL/2016/11. This Disclosure Report satisfies these requirements for the reporting date of 31 March 2018. The supplementary provisions set out in Sections 10 and 10a of the German Banking Act (Kreditwesengesetz – KWG), Article 13 CRR, the transitional provisions set out in Part 10 CRR and the regulatory and implementing standards, EBA Guidelines and EBA Q&As of relevance to disclosure are also taken into account.

The frequency and scope of the Disclosure Report are based on the requirements specified in the guidelines EBA/GL/2016/11 and EBA/GL/2014/14. The information to be disclosed in this report is subject to the materiality principle as specified in Article 432 CRR in conjunction with the EBA guideline EBA/ GL/2014/14. The use of the materiality principle at Helaba is described in the table below and in the sections referenced in the table. Helaba's approach to disclosures is regularly reviewed on the basis of a framework of requirements established by the Group to ensure that the approach is appropriate and fit for purpose; operational responsibilities are set out in detailed operating procedures.

On the basis of the EBA/GL/2016/11 guideline, which has had to be applied at Helaba since 31 December 2017, reports will be issued quarterly from 2018. The content of this reporting, which was previously required in accordance with the CRR, has now been expanded and made more specific.

The following table sets out an overview of the quantitative requirements, the relevance for Helaba and the use of the materiality principle, together with cross-references to the relevant section or external documents. The table also lists qualitative requirements that are not included in the disclosure report but are covered in other Helaba publications.

Overview of quantitative and qualitative requirements in accordance with the CRR and EBA/GL/2016/11

	Disclosure interval			
	Quarterly	Half-yearly	Annually	
Article 447 CRR – Exposures in equities				
Article 450 CRR – Remuneration policy disclosures				
Article 441 CRR – Indicators of global systemic importance				
Article 473 CRR in conjunction with EBA GL 2018/01 – Disclosure of IFRS 9 transitional arrangements				
Section 26a KWG – Country by Country Reporting				
Section 35 SAG – Financial Assistance Provided Within the Group				

Article 13 CRR requires significant subsidiaries of EU parent institutions and those subsidiaries that are of material significance for their local market to prepare their own disclosure report on an individual or sub-consolidated basis.

Helaba's FSP subsidiary falls under this separate disclosure requirement. Since the disclosure reporting date of 31 December 2015, the disclosure report for FSP as an individual bank has been published in a "Disclosure report" section within its **Annual Report**, which is available on FSP's website. The disclosure report will be updated each year in the same way as FSP's **Annual Report**. The regulatory capital requirements and Helaba's own funds are based on financial reporting in accordance with IFRS. Since 1 January 2018, the figures have taken into account the new financial reporting requirements under IFRS 9.

Please refer to the "Risk report" section in conjunction with the "Responsibility statement" in the Helaba Group's **Annual Report** for information on declarations by the Board of Managing Directors regarding the appropriateness of the risk management system at Helaba pursuant to Article 435 (1e) CRR. Given the differences between the scope of prudential consolidation and the basis of consolidation under German commercial law, more detailed information relating to the financial statements can also be found in the **Annual Report**.

	Helaba relevance	Materiality principle applied	Reference
	x		More detailed information on equity investment exposures, is included in Note (30) et seq. and Note (42) et seq. of the Notes to the Consolidat- ed Financial Statements in the Annual Report.
	x		The disclosures are presented in a separate remuneration report and published on Helaba's website (offenlegung.helaba.de)
	Helaba is identified as an Other Systemically Important Institution and so the requirements stipulated in Article 441 CRR do not apply		
t	Helaba will not make use of the transitional regulatory rules in accordance with Article 473 a) CRR covering the inclusion of the ini- ial application effects when determining cap- ital ratios and so the requirements stipulated in Article 473 CRR in conjunction with EBA GL 2018/01 do not apply		_
	x		Disclosures can be found in the section Country-by-country reporting in accordance with Section 26a KWG in the Annual Report (geschaeftsbericht.helaba.de)
	x		The disclosures are included in the Annual Repor (Note (74) in conjunction with Note (75) in the Notes to the Annual Financial Statements). The equivalent disclosures at Helaba Bank level are in the Annual Financial Report (Note (44) in the Notes to the Annual Financial Statements).

Scope of Application

These disclosures are provided for the Helaba Group on the basis of the group of consolidated companies for regulatory purposes pursuant to the KWG/CRR. The document is prepared and coordinated by the parent company – Helaba.

A total of 23 companies are fully consolidated in the consolidation process for regulatory purposes in accordance with Sections 10 and 10a KWG and Article 18 CRR in addition to Helaba as the superordinated institution, and one other company is included in the consolidation on a pro-rata basis. A further 47 companies are excluded from the scope of consolidation for regulatory purposes in accordance with Section 31 KWG in conjunction with Article 19 CRR. Since the previous reporting date of 31 December 2017, Helaba Digital GmbH & Co. KG has been added to the group of consolidated companies for regulatory purposes. This subordinated company, which is classified as a financial institution, is now also included in the IFRS consolidated financial statements as a fully consolidated company.

Group of consolidated companies for regulatory purposes (overview)

Regulatory treatment	Number and type of companies	
Full consolidation	23 companies 16 financial institutions 2 asset management companies 3 banks 1 investment firm 1 provider of ancillary services	
Proportional consolidation	1 company 1 financial institution	
Excluded from the scope of consolidation for regulatory purposes	47 companies 46 financial institutions 1 provider of ancillary services	

Own Funds and Own Funds Structure

This section presents information about the Helaba Group's key figures together with a breakdown of the own funds requirements

for each risk type in accordance with the COREP report under Pillar I as at 31 March 2018, compared with the previous quarter.

in € m

There were no own funds requirements on the reporting date for trading book activities of the Helaba Group in relation to large exposures above the limits set out in Articles 395 to 401 CRR.

As at the reporting date, there were also no equity investments in insurance companies that are not deducted from own funds in accordance with Article 49 (1) CRR.

The most significant changes in RWAs compared with 31 December 2017 result from an increase in the "equity exposures"/"higher risk categories" and "corporates" exposure classes in the CRSA and from market risk. An offsetting effect is attributable to the securitisation exposures in the banking book.

The increase in the "equity exposures" and "higher risk categories" exposure classes (approximately \in 625 m RWAs) is mainly due to the fair value measurement in accordance with IFRS 9 and the discontinuation of grandfathering. The change of approximately € 453 m in the "corporates" exposure class in the CRSA is primarily the result of reclassifying securities from the "central governments" exposure class (mostly zero risk weighted) in an investment fund (look-through). The decline in the securitisation exposures in the banking book was caused by reclassifying specialised lending exposures back into the IRB "corporates – specialised lending exposures" exposure class in accordance with the new EU Securitisation Regulation 2017/2402 and interpretative decision 52-18/006 of the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – BaFin).

The RWA increase under market risk arose, firstly, from a business-related increase in the securities business under specific interest rate risk (approximately \in 193 m) and, secondly, from the internal model (approximately \in 305 m). The changes under the internal model are mainly attributable to changes in exposures resulting from normal trading activities.

Credit risk

Credit risk and credit risk mitigation in the IRB Approach

In December 2006, Helaba received approval from the German Federal Financial Supervisory Authority (BaFin) to use the Foundation Internal Ratings-Based (FIRB) Approach as specified in the German Solvency Regulation (Solvabilitätsverordnung – SolvV); this approval covered both the Helaba Group and Helaba Bank. The parameters laid down in the Foundation Approach for internal ratings have been applied for both regulatory capital backing and internal management purposes since 1 January 2007. The approval of the rating model for aircraft finance in December 2010 marked the completion of the regulatory audits in relation to the use of the internal rating models for the FIRBA and thus the full delivery of the IRBA implementation plan. The AIRB Approach has been applied for the retail portfolio of FSP since the second quarter of 2008. In 2013, LBS became the first Bausparkasse to gain permission to use the "LBS-Kunden-Scoring" rating model and the LGD model devised by Sparkassen Rating- und Risikosysteme GmbH (S-Rating) in the AIRB Approach for retail exposures.

The changes in RWAs for credit risk exposures under the IRB Approach between 31 December 2017 and 31 March 2018 are presented below.

EU CR8 - RWA flow statements of credit risk exposures under the IRB Approach

		a	b	
		RWAs	Own funds requirement	
1 R	WAs at previous quarter-end	34,774	2,782	
2 A	sset size	281	23	
3 A	sset quality	43	3	
4 M	lodel updates	-2	0	
5 N	lethodology and policy changes	692	55	
6 A	cquisitions and disposals		_	
7 F	oreign exchange movements	-169	-14	
8 0	ther	0	0	
9 R	WAs at the end of the current quarter	35,619	2,849	

In the table above, the changes in RWAs are broken down for each of the key RWA drivers:

- Asset size: changes in the carrying amount due, among other factors, to new or discontinued business or changes in the portfolio
- Asset quality: changes related to credit ratings and credit risk mitigation
- Model updates: model adjustments to internal rating methods
- Methodology and policy changes: new regulatory requirements, discontinuation of transitional provisions and the like

- Acquisitions and disposals: changes based on the group of consolidated companies for regulatory purposes
- Foreign exchange movements: changes in exchange rates for foreign currency transactions
- Other: includes all other changes that cannot be attributed to the categories above.

The changes listed under methodology and policy changes in the table above are the result of the initial application of IFRS 9 and the discontinuation of grandfathering provision for exposures in equities. The foreign exchange movement arose principally from transactions in US dollars and sterling.

Annex

Market risk

Internal model

All market risks are quantified every day using a money-at-risk (MaR) method backed up by stress tests and sensitivity analyses. The MaR specifies what is deemed, with a certain confidence level, to be the upper threshold of the potential loss of a portfolio or position due to market fluctuations within a prescribed holding period.

Helaba calculates the regulatory own funds required for the general interest rate risk using an internal model in accordance with the CRR for Helaba Bank. This model, which consists of the risk measurement systems MaRC² (linear interest rate risk) and ELLI (interest rate option risk), has been approved by the banking supervisor.

The changes in RWAs under the internal model between 31 December 2017 and 31 March 2018 are presented below.

7	Other	6	15	_		_	20	2
8a	RWAs at current quarter-end (end of the day)	195	412	_			607	49
8b	Regulatory adjustments ¹	346	799	_			1,145	92
8	RWAs at the end of the current quarter	542	1,211	-		-	1,753	140

¹ Shows the difference between previous/current quarter RWAs and previous/current quarter RWAs (end of day)

The changes in RWAs compared with the previous quarter are mainly attributable to changes in positions resulting from normal trading activities. The other effects include changes attributable to movements in market interest rates, regular monthly updates of the statistical parameters for the MaR as well as a switch in the periods used for the crisis scenario in the stressed MaR.
