INVESTORRELATIONS

PERFORMANCEFIGURES

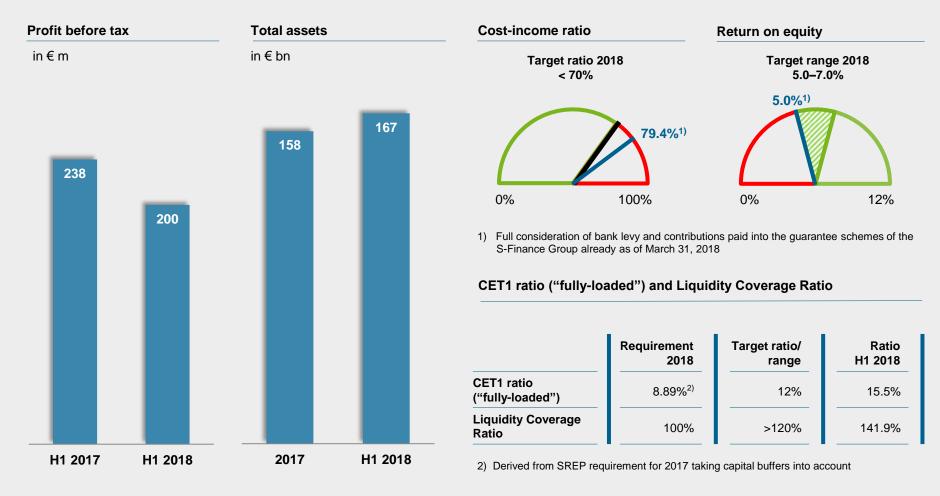

Profit before tax on target level

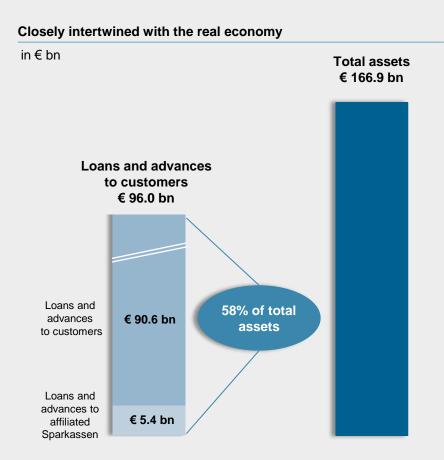

- Conditions continue to be challenging and weigh in particular on the net interest income. In this context, the consolidated profit before tax of € 200 m was € 38 m below H1 2017
- Risk situation remains comfortable and, as in the previous quarters, the risk provisioning requirement is low
- Second quarter saw a noticeable rise in the volume of new business
- Implementation of regulatory requirements weighing on general and administration expenses
- CET1 ratio (phased-in and fully-loaded) of 15.5 % and total capital ratio of 21.5 % both remain significantly above regulatory requirements

Development of key financial ratios reflects the challenging market environment

Helaba 🔤

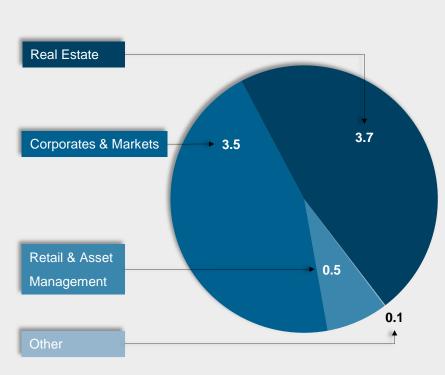

Customer business dominates balance sheet structure

- In H1 2018 degree of interconnectedness with real economy slightly decreased to 58 % due to an increase in total assets (2017: 60 %)
- Small increase in loans and advances to customers to € 96.0 bn (2017: € 95.3 bn)

New medium and long-term business: € 7.8 bn *

in € bn

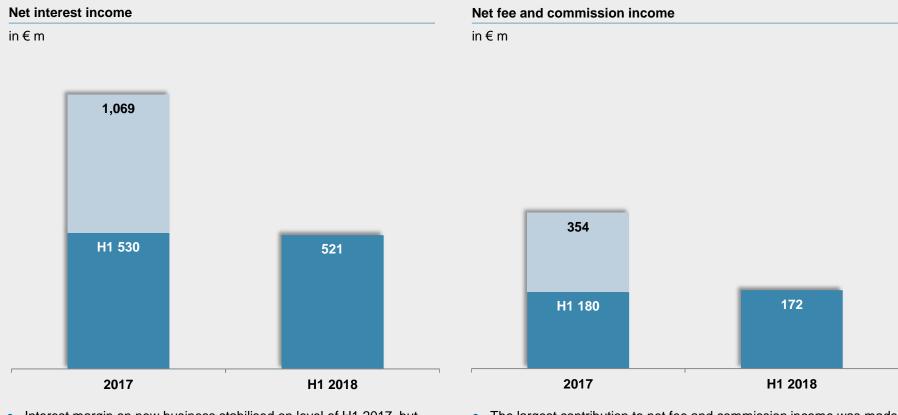

* New medium and long-term business excl. WIBank

 Recovery in new business volume in the second quarter; volume of new medium and long-term business (duration greater than one year) at € 7.8 bn, but still below volume in H1 2017 of € 9.1 bn

INVESTORRELATIONS

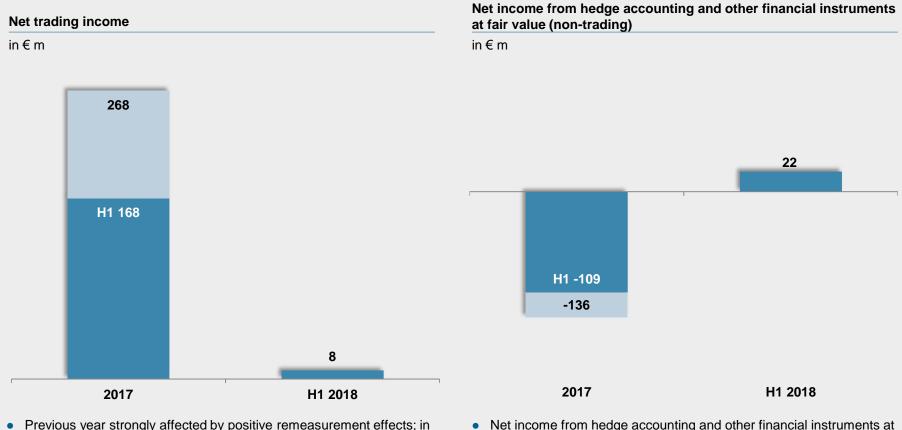

Net interest income and net fee and commission income slightly below previous year

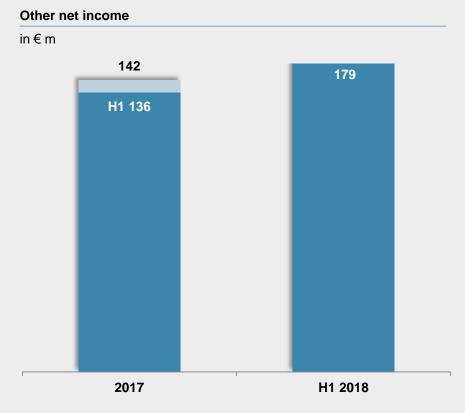

- Interest margin on new business stabilised on level of H1 2017, but net interest income still declines as a result of lower average portfolios
- The largest contribution to net fee and commission income was made by Helaba's payment transaction business and Helaba Invest's asset management activities
- Slight decrease in securities and securities deposit business as well as in lending and guarantee business

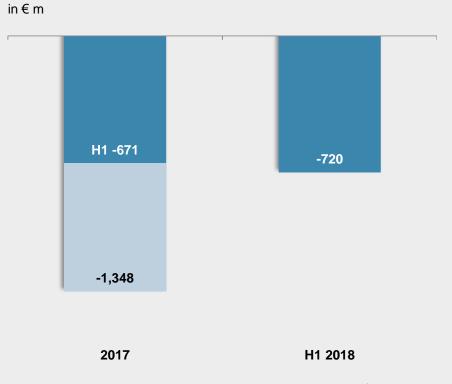

Significantly lower impact of remeasurement effects

- Previous year strongly affected by positive remeasurement effects; in contrast, widening credit spreads had a negative impact in the first half of 2018
- Operating profit from customer-driven capital market business on a satisfactory level
- Net income from hedge accounting and other financial instruments at fair value (non-trading)
- Negative impact in previous year due to temporary remeasurement effects, since 2018 recorded in equity with no effect on P&L

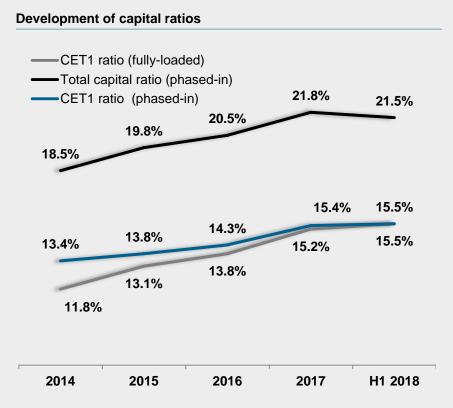

General and administrative expenses

- Significant increase due to elimination of non-recurring effects that had negative impact last year as well as to proceeds from sale of LB(Swiss) Investment AG
- Stable net income from real estate portfolio (mainly GWH)
- Scheduled depreciation on these property portfolios from 2018 recorded in general and administrative expenses (previous year's figure adjusted accordingly)
- Increase in general and administrative expenses resulted from, among others, higher costs for IT investment and consultancy fees in connection with the implementation of regulatory and business-driven requirements
- Annual bank levy of € 40 m (H1 2017: € 38 m) as well as contributions to guarantee schemes of S-Finance Group in an amount of € 29 m (H1 2017: € 29 m) taken fully into account

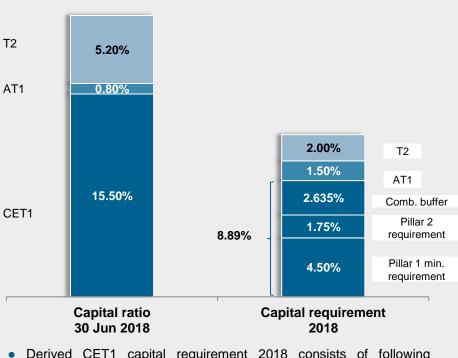

Capital ratios significantly exceed regulatory capital requirements

- Continuous improvement in capital ratios to a very high level
- There will be no further differences in 2018 for Helaba's CET1 ratio as a result of CRD IV / CRR transitional arrangements
- Leverage ratio at 4.8% (phased-in) and 4.5% (fully-loaded)
- Risk-weighted assets of € 51.9 bn

Capital requirements and components

- Derived CET1 capital requirement 2018 consists of following components:
 - Pillar 1: minimum capital requirement of 4.50%
 - Pillar 2: capital requirement of 1.75%
 - Total capital buffer of 2.64%

| Assets | | 73.5 |
| Risk-weighted assets | 20.3 | 20.1 |

- Represents customer-driven business; in addition to credit products, also comprises trading and sales activities as well as payment transactions
- Both net interest income and net fee and commission income remain on same level as last year; net trading income impacted by credit spread widening while the previous year's result was marked by positive measurement effects
- Risk provisioning requirement again reduced compared to previous year
- Higher general and administrative expenses due to increased allocation to overheads
- With around € 78 m, Corporate Finance unit makes largest contribution to segment result

| Assets | | 30.0 | 29.2 | |
| Risk-weighted assets | | 6.6 | 6.0 | |

- Segment comprises retail banking, private banking, LBS as well as asset management activities (especially GWH, Helaba Invest)
- The increased administrative expenses could be compensated by higher segment income, inter alia by the sale of LB(Swiss) Investment AG; segment result therefore slightly higher than in the previous year
- Significant easing of risk situation, as in the previous year

Development Business | Stable result of WIBank

| opment Business H1 2018 | | H1 2017 | Change |

| Risk-weighted assets | 9.0 | 8.6 |

- This segment contains profit contributions and expenses that cannot be allocated to other business segments, especially earnings from treasury activities, OFB as well as costs of central corporate units
- Previous year weighed down by temporary remeasurement effects; recorded in equity with no effect on P&L since 2018
- Reversals of portfolio impairments on credit exposures with no significant risk of default
- General and administrative expenses mainly includes the costs of bankwide projects as well as annual contributions to bank levy and guarantee schemes that have been fully accounted for
